

COVID-19 Update Platinum Communities

The highest priority at Platinum Communities is the well-being of our residents and staff. In response to the ongoing public health concern and with direction from the Department of Health and Human Services, we have outlined updated precautions below;

- Platinum Communities is adhering to strict health and safety protocols, including regular sanitizing and cleansing measures at each facility
- Protocols are based on recommendations from the Centers for Disease Control and Prevention and the Wisconsin Department of Health Services.
- To protect the health, safety and well-being of our residents, their families and staff, Platinum Communities instituted campus-wide lockdowns March 12 before being instructed to do so.
- We continue to monitor residents and staff for symptoms of COVID-19 and will take all appropriate precautionary measures and adhere to reporting requirements.
- We are actively screening all visitors, residents and employees daily.
- We do have one confirmed case of COVID-19 at one of our communities and that resident has been hospitalized. The individual remains at the hospital and has not returned to Platinum Communities.

Additional guidelines, policies and information can be found on our website at www.platinum-communities.com COVID-19 button.
